--------------------	---

BurnFree solves the immediate first aid needs for all types of burns by relieving the pain, rapidly removing the heat, and cooling the burn.

The BurnFree 6' x 5' (183 cm x 152 cm) Fire/Trauma Blanket is a good size for escaping a fire. BurnFree Fire/Trauma Blankets are designed for emergency and industrial use, and to also provide physical protection from heat, fire, and smoke.

During transport to a medical facility, the blanket will soothe the victim, reducing physiological and psychological trauma. It will cool the burn, and draw the heat out to prevent further tissue and nerve damage.

The blankets are made of a pure virgin wool, woven with a unique interlinking cell construction. The special construction of the wool, allows for the blanket to hold up to 14 times its weight with BurnFree's specially formulated gel. The water-soluble gel is easily removed and will not adhere to the skin.
